EDUCATION

Duke University — *Bachelor of Science (Magna Cum Laude)* Aug 2018 - Dec 2021
Major in Computer Science, Minor in Mathematics. **GPA: 3.92/4.0**
Coursework: Algorithms, Computer Architecture, Discrete Math, Probability, Linear Algebra, Databases, Adv. Software Design, Applied Math, Combinatorics, ML, Artificial Intelligence, Sampling & Markov Chains

WORK EXPERIENCE

Meta Platforms Menlo Park, CA
Machine Learning Engineer May 2025 - Present

- Working on ML graph compilers, PyTorch, and inference for ML models across Meta on custom silicon.
- Developing support for dynamic tensor shapes during inference, and model serialization/deserialization.

Nuro Mountain View, CA
Sr. Software Engineer (Autonomy/Perception) Dec 2024 - May 2025
Software Engineer (Autonomy/Perception) Feb 2022 - Dec 2024

- Built eval metrics and safety systems to measure and gate ML model accuracy for self-driving vehicles.
- Built 3D data auto-labeling and generation methods to produce high-quality data for ML at lower costs.
- Made architectural changes and trained models to improve detection and tracking for rare objects. [↗](#)
- Designed, wrote, and validated onboard modules to detect on-road collisions and initiate safety response.

Meta Platforms Menlo Park, CA
Software Engineering Intern (Full Stack) May 2021 - Aug 2021

- Built a database schema *linting* service and API to analyze and validate data from datacenter networks.
- Used **Thrift**, **Python**, and **PHP**. Deployed service to production networks data monitoring, and CI/CD.

ANB Systems Houston, TX
Software Engineering Intern (Full Stack) May 2020 - Aug 2020

- Worked on unstructured document recognition and extraction algorithms, and visualization pipelines.

Evidence for Policy Design - EPoD New Delhi, India
Software Development Intern (Full Stack) May 2019 - Aug 2019

- Worked on data ETL for randomized controlled policy trials and social networks data (fuzzy algorithms).

Dept. of Computer Science, Duke University Aug 2019 - Dec 2021
Teaching Assistant: Intro CS, Interdisciplinary Computing, Programming Interview Skills, Databases

PUBLICATIONS & PROJECTS

Transformers For Recognition In Overhead Imagery: A Reality Check [PDF](#) [↗](#).
Francesco Luzi, Aneesh Gupta, Leslie Collins, Kyle Bradbury, Jordan Malof WACV 2023

Applied Machine Learning Lab [↗](#) - *Undergraduate Researcher* Aug 2019 - Dec 2021
Semantic segmentation for medical imagery and satellite imagery. Explored encoder-decoder networks, vision transformers, texture synthesis, style transfer, and other ML techniques. [↗](#)

Genesis.AI: Hacked on a Text-2-Video GIF generator using open-source generative models. [↗](#) Dec 2023

SKILLS

Programming Languages	Python, C++, JavaScript, TypeScript, SQL, Lisp, R
Frameworks & Tools	Django, MongoDB, React, PyTorch, TF, Git, L ^A T _E X, Pandas, NumPy
Other Interests	Economic Development, History, Philosophy, Computer Vision, Graphics
